

TECHNOTHON:

DESCRIPTION:

It is 9 hours continues coding competition in the given programming language and problem will be provided by us.

RULES:

1. Participants are supposed to choose any one from the three programming languages i.e. C, C++, Core Java.
2. For above three languages, Systems will be provided by us.
3. If participants want to go for any other coding language apart from these three, it is allowed, but for that they are supposed to bring their own laptop with appropriate coding tool/software with them.
4. According to the selected language, we will provide the aim/definitions.

EVENT GUIDELINES:

1. There will be three phases in this event; 3 hours will be the maximum time limit for each.
2. In each phase a new task/program definition will be given.
3. Participants will go through each of the phases in this event.
4. Judgment will be on the time basis and on the efficient output of the given program.
